

Purchase Order Received Statuses

Last Modified on 05/24/2023 2:37 pm EDT

Status codes used to flag P.O. items to mark them as Received, Not Received, etc. Status codes are maintained under Settings > Purchase Order > Received Statuses.

The P.O. status can be seen on the P.O. detail line. The status can be entered upon entry or changed at any time; however User Account Restrictions are considered.
