A.I. Settings

Settings > Accounts Payable > Digital Invoice Templates

Digital Invoice Capture template A.I. settings enable the system to establish default instructions for invoices not separately identified by templates.

- **Enable A.I. machine learning** – activates A.I. machine learning for invoice data capture.
 - **Enable Vendor ID inference.** When activated, the system will attempt to match the vendor name in the invoice image to the master vendor list. The vendor ID is assigned to the captured invoice if a match is found.
 - **Data to Capture** – all checked items will be captured for invoices not separately identified by templates
 - Invoice Number
 - Invoice Date
 - Due Date
 - Purchase Order (if Purchasing system is activated)
 - Amount(s)
 - Total Only – only the overall total invoice amount is extracted
 - All – all listed invoice amounts are extracted
 - Default GL Account – the default GL account applied to all captured amounts
